ABOUT ME

I'm a fourth-year B.Tech CSE student (2023–2027) at MIET Meerut who has been building real production systems — not just coursework projects. I've interned at IIT Roorkee and at EKLabs, where I worked on a full-stack AI-powered ERP platform end to end: API design, auth, dynamic React UI, database integration. I pick up new stacks fast, write clean code, and ship things that actually work.

TECHNICAL SKILLS

Frontend	React.js, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Responsive Design
Backend	FastAPI (Python), REST API design, PHP (basics)
Databases	Supabase (PostgreSQL), MySQL, MongoDB
Languages	JavaScript, Python, Java, C
CS Fundamentals	OOPs, Data Structures & Algorithms, DBMS
Dev Tools	Git, GitHub, VS Code, Postman, npm
Cloud / AI	Oracle Cloud (Generative AI Certified), AI API integration

INTERNSHIP EXPERIENCE

Research Intern — On Campus · [IIT Roorkee](#) · [AMSC Lab](#) · June 2026

- ▶ Selected for a competitive on-campus summer research internship at IIT Roorkee (India's top-3 engineering institute)
- ▶ Worked under faculty supervision on real-world technical problems in a structured research environment
- ▶ Contributed to documentation, development workflows, and collaborative engineering practices at research grade
- ▶ Applied web development and software engineering principles to solve domain-specific challenges

Project / Research Intern · [EKLabs](#) — [AI Agent for Pharma](#) · 2026

- ▶ Built a production-grade full-stack AI-assisted ERP using React (frontend), FastAPI (backend), and Supabase (PostgreSQL)
- ▶ Designed and tested 40+ REST API endpoints from scratch; fixed a critical JWT auth bug (HS256 vs ES256 mismatch) that was breaking all secure routes
- ▶ Followed Git discipline throughout: feature branches, PRs, clean commit messages, code review cycles
- ▶ Worked remotely and async with mentors and teammates, delivering iteratively under real-world time constraints

PROJECTS

Smart Inventory — AI-Powered Invoice & Inventory ERP — React · FastAPI · Supabase · Gemini Vision API

- Building an intelligent ERP with automated invoice OCR using Gemini Vision API and GSTIN validation
- Designing ledger/voucher system with full audit trail; frontend in React + Tailwind + shadcn/ui
- Sole developer — managing architecture, database design, and UI end to end

Automated Student Attendance System — Python · Computer Vision · React [↗ Click to View](#)

- Built facial-recognition attendance system — UI to backend processing — entirely from scratch
- Selected at SIH 2026 (Smart India Hackathon) at college level — Top 20 team out of 180; led full dev lifecycle and team

- Personal portfolio showcasing projects and skills • Deployed live [Portfolio/Krish Sharma](#)

EDUCATION

B.Tech — Computer Science Engineering · [MIET, Meerut](#) · 2023 – 2027

Intermediate (Class 12) · Guru Tegh Bahadur Public School, Saharanpur · 2022

High School (Class 10) · Guru Tegh Bahadur Public School, Saharanpur · 2020

CERTIFICATIONS & ACHIEVEMENTS

- ▶ Smart India Hackathon (SIH) 2026 — [College Level Qualifier](#)
 - Top 20 team out of 180 · Built Automated Student Attendance Monitoring System
- ▶ Oracle Cloud Infrastructure 2025 — [Certified Generative AI Professional](#)
- ▶ Consulting & Summer Analytics Program — [IIT Guwahati](#)
- ▶ Introduction to MongoDB — [Certified](#)

CURRENTLY LEARNING

React Native · PHP & MySQL · WordPress · Microsoft Azure · AI/ML Integration · Cybersecurity basics
